**CUSTOMIZABLE FAUCET DESIGN AND HIGH PERFORMANCE FEATURES
MEETS THE DEMANDS OF THE HOME GOURMAND
KWC SYSTEMA™: Interchangeable Components to Suit Individual Needs**

NORCROSS, Ga. (May 2007) – A system of interchangeable matching components coupled with the professional look and performance of stainless steel, make the KWC SYSTEMA a unique offering among today's kitchen faucet designs.

"The KWC SYSTEMA works well with many design styles, ranging from classic to contemporary," says Mick De Giulio, president of De Giulio Kitchen Design. "The simplicity of design, coupled with customizable faucets, makes the KWC SYSTEMA the perfect complement to a client's personal style."

The KWC SYSTEMA is designed for the residential chef desiring a kitchen as individual as the culinary masterpieces created there. This innovative line of faucets allows gourmands to mix and match features and components to create their ideal water appliance and delivery system.

It offers a variety of elements from an extension pillar to raise the height of the faucet to a pre-rinse spray, creating a unique and high-performance faucet. The collection also provides the ability to integrate a soap dispenser or pull-out spray. A pot filler is also included in the collection of faucets. In addition to the stainless steel finish, the KWC SYSTEMA is available in chrome, while select models are offered in Splendure™ Stainless Steel (a KWC AMERICA finish that provides durability greater than traditional surface finishes).

For more information about the KWC SYSTEMA or other KWC AMERICA products, call 678.334.2121 or visit www.kwcamerica.com.

ABOUT KWC AMERICA
